

# Genius. Now there's an app for that!

Loadrite® OnSite™ empowers users to effortlessly collect payload data directly from their wheel loader and excavator scales using a user-friendly mobile app over Bluetooth. This data can then be seamlessly emailed in a straightforward .csv format, putting users in complete control of their productivity metrics. Yeah, pretty ingenious right?

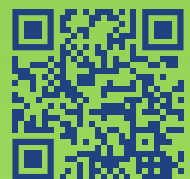

## Experience immediate results

- Offline Functionality
- Wireless Data Transfer
- Cost Effective
- Share Data Instantly
- Huge Time Saver

# Let's talk features and benefits!

## We've taken the most popular tasks and added them to a simple app.

### Mobile App

Data collection via mobile phone offers a modern and seamless experience to the user, without a significant expense.

### Offline Functionality

Ability to download payload data without the need for cellular coverage because all data is saved directly to your device for use on your schedule.

### Cost-Effective

The app offers a cost-effective solution with a one-time payment, no ongoing subscription fees. This provides an affordable, long-term solution for users.

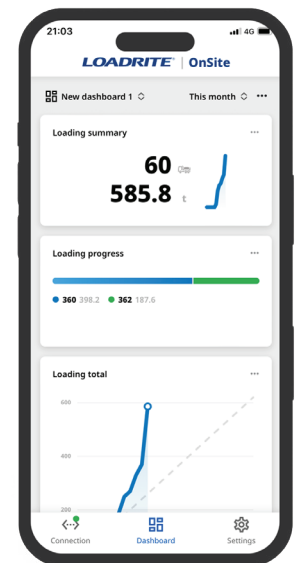

### Time Savings

No need to manually enter in load info for the day, all transactions are provided in .csv format once transferred.

### Wireless Data Transfer

All data is downloaded from the indicator once a user is in range with the app running. Data is then transferred automatically with Bluetooth.
